

Clear Pond

Advanced 7 stage filtration system

Clarity & purity - an advanced 7 stage filter with a high powered U.V.C and quick action back flush (de-sludge) system.

Combined U.V.C

All models come with high powered U.V.C to ensure green water elimination.

Multi-chambered design

Including filter brushes to help catch physical waste.

Biological filtration

Filter foam cartridges & Flocor® help create a mass area for beneficial bacteria, which break down harmful toxins.

Back flush

A simple way to remove sludge and silt build up from the filter tank.

Top In - Top Out

Can be partly buried.

Creates a clean, clear, healthy pond

Pick the most suitable model for your pond (always upgrade to the next model if close to capacity). Combine with the recommended pump and watch your pond clear.
